## PROFESSIONAL SUMMARY

Highly driven and detail-oriented **Junior Front-End Developer** with hands-on experience building pixel-perfect, scalable, and responsive web interfaces. Adept at crafting seamless user experiences using **HTML, CSS, and JavaScript**, and known for pushing creative boundaries through animation, mobile-first design, and performance-focused development. Demonstrated success improving mobile responsiveness and enhancing user engagement. Skilled in version control, debugging, and deploying production-ready applications. Passionate about continuous learning and delivering clean, efficient, and maintainable code.

---

## EXPERIENCE

### Xerax Labs Inc., Lagos — Junior Front-End Developer (Internship)

March 2024 – Present

- Developed clean, modern, and responsive UI components using **HTML5, CSS3, and JavaScript**.
  - Built and deployed high-quality internal web interfaces, ensuring top-tier performance and accessibility.
  - Implemented animations and smooth interactions using libraries such as **ScrollReveal, Animate.css, and Swiper.js**.
  - Collaborated with the team to enhance mobile adaptiveness, resolving numerous issues and contributing to a notable increase in user adoption.
  - Utilized **Git & GitHub** for version control, code reviews, and automated deployments via GitHub Actions.
  - Troubleshoot bugs, optimized UI layouts, and improved overall user experience across multiple devices.
- 

## PROJECTS

## Responsive Portfolio Website

Designed and developed a fully responsive personal portfolio using HTML, CSS, and JavaScript, showcasing projects with smooth animations and clean layout structures.

## Interactive Web Components

Built reusable components—including sliders, interactive cards, and animated sections—using Swiper.js, ScrollReveal, and custom JavaScript.

## Landing Page Redesign (Internal Project)

Revamped an existing landing page to improve user flow, loading speed, and mobile responsiveness.

---
